

CLIQ® Go

Access control at your fingertips

ASSA ABLOY
Opening Solutions

Experience a safer
and more open world

**Anytime,
anywhere**

With the CLIQ Go app,
you keep your business
secure on the go

Manage your security via the CLIQ Go App Because your business is changing constantly

Do you recognise this situation?

Managing a business today means that you will be away from your desk, more than sitting in your office. While you are away, security needs change: new staff join, keys are lost, access rights need to be changed.

The CLIQ Go app moves security to a new dimension, enabling you to control security in your building from your mobile device.

Schedule access to your rooms, or give contractors time-limited access

As your business grows, you can expand the system without disruption at the door

If a key is lost, you can revoke access via the CLIQ Go App

CLIQ Go takes access control to the cloud, so you can manage your security anytime, anywhere

In a busy world, you need security systems that are flexible, leaving you to focus on growing your business

It's so easy to manage lost keys ...

*Lost keys are a serious security risk.
With CLIQ Go, you can revoke access rights anytime, anywhere*

..... An example

1 Your receptionist informs you about the lost key

2 You revoke the lost key in real-time with the CLIQ Go App wherever you are

3 The receptionist programmes a key to revoke access rights at the door

How does it work?

CLIQ Go app

Cloud based
CLIQ Go

Manage your system with the CLIQ Go app

1. Select the user key
2. Revoke access rights for lost key and generate a new key with access rights (e.g. schedule & door) or change access rights for existing key
3. Optional: Programme the key directly with the programming device on the run

...and change access

Access needs can change very quickly, and you need to react fast. CLIQ Go allows you to manage access in real-time

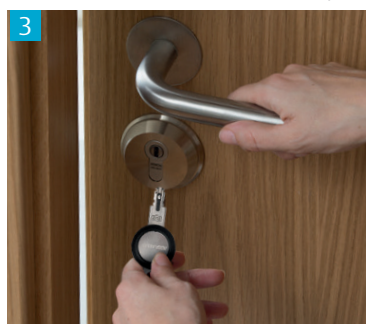

An example

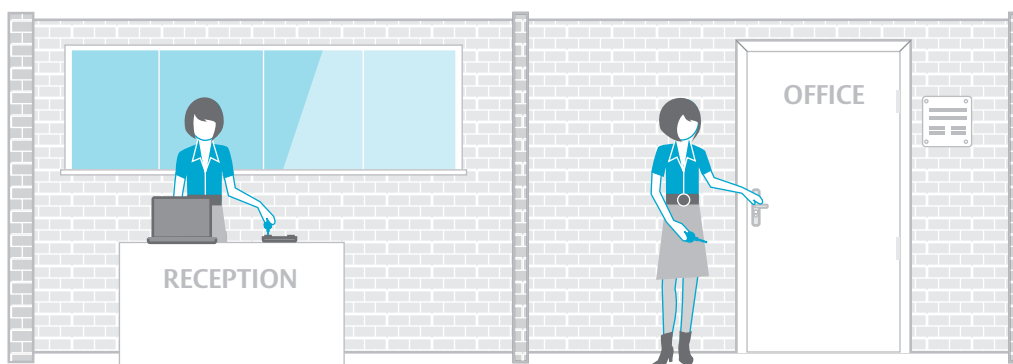

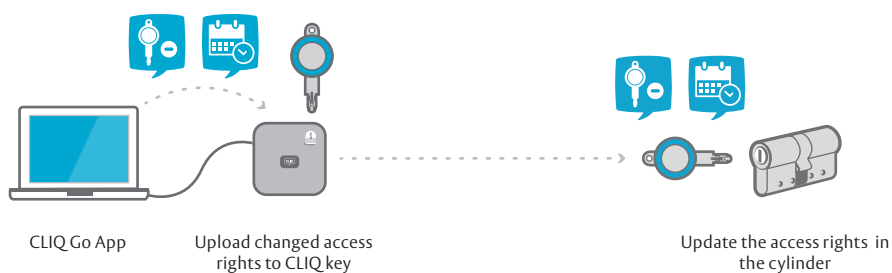

1 Your employee needs access to a new door and calls the manager

2 You change access rights of the key in real-time via the CLIQ Go App, wherever you are. The employee then simply updates the key at the reception

3 Your employee is granted the access she needs, with minimal fuss

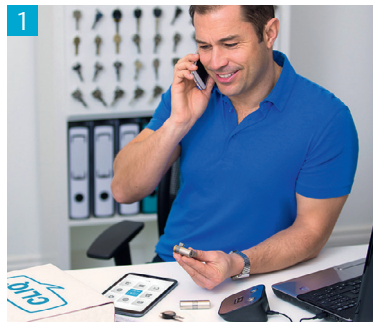

Businesses do not stand still

As your company grows, you need to know that your security system is flexible

An example

1 Your locksmith receives your request for new keys and cylinders and he can deliver new components very quickly

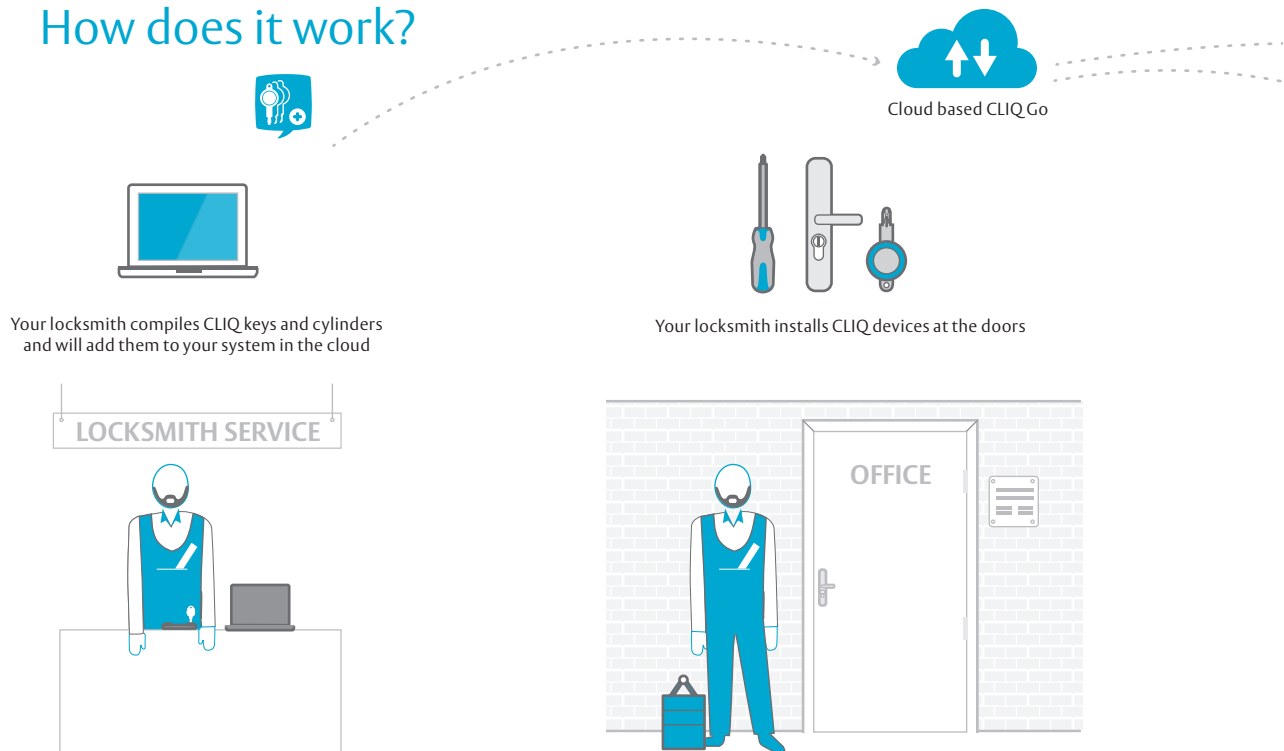

2 He programmes new cylinders and keys in his office. You can view updates via the CLIQ Go App

3 Installation is quick with minimal disruption at the door

How does it work?

CLIQ Go

The locking system that keeps your business on the move

- High security CLIQ cylinders for all door types, battery in the key, low maintenance, no cabling, long life time of 200.000 cycles

- CLIQ programming devices for keys, available in desktop or mobile versions

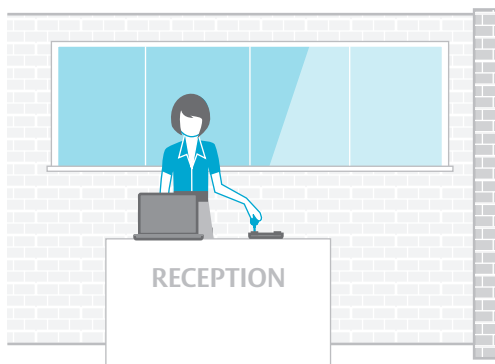

- The cloud-based system means that the CLIQ Go app works seamlessly. As an option your locksmith can manage the system as a service.

Receive updates of new keys and cylinders automatically in your CLIQ Go PC application
