

Government headquarters, Hong Kong

Project Fast Fact

Location

Hong Kong

Complete year

2011

Architect

ROCCO DESIGN
ARCHITECTS
LIMITED

Developer

Hong Kong SAR
Administrative Office

Owner

HKSAR Government

Feature products

DP440 series
Abloy door
automatics solutions

Challenge

The project involved advanced specifications, as the different government departments housed on the site all have their own security requires. For example, the door of the chief executives officer's office needed to be bullet-proof and explosion-proof, while keeping the look of the door neat and stylish.

Solution

ASSA ABLOY Hong Kong was chosen to provide a full package of door hardware from locking solutions to escape hardware including 4,000 units of high security ASSA (DP440 series) cylinders and 200 sets of Abloy door automatics solutions.

The Hong Kong SAR government's architectural service department supervised the whole design and building project to make sure all the hardware specified fulfilled the security and safety requirements and architectural regulations in Hong Kong.
