Product  
ABLOY DislockPro Cylinder  
ABLOY Electric Lock  
Electromagnetic Shear Lock  
Trimec (Electric Dropbolt  
and Electric Strike)  
Lokador Hinge and  
Miscellaneous

## Challenge

ICAC does not have a Headquarters before the Java Road building and its Administration Branch and three departments, namely, the Operations Department, Corruption Prevention Department and Community Relations Department, were scattered in different buildings. Approved by the government in 2003, the new building includes training school, indoor shooting range and a multi-purpose theatre.

## Solution

The 27-storey purpose-built headquarters cover the ICAC offices and training facilities to cater the Commission's existing and projected demands. Due to the unique function and requirement of this building, ASSA ABLOY Hong Kong provided Yale ANSI Standard Mechanical Product Package, Abloy DislockPro Cylinder, Electronic Products from Securitron (Electromagnetic Shear Lock), and Trimec (Electric Dropbolt).
