Project Details

Danfoss India, a major player in the climate and energy space, inaugurated its new manufacturing, research and development campus in Chennai.

It is the Indian subsidiary of Danfoss Global, a leader in energy management and cold chain technologies.

Danfoss, through its focus on local manufacturing and R&D in the new campus, plans on making India a manufacturing-cum-export hub for its regional subsidiaries .

The new campus encompasses facilities for research and development, skill development and product development along with customer application development center and testing labs with a focus on innovation for customized solutions.

Solution

ASSA ABLOY India supplied mechanical hardware, ANSI Locks, Door closers , Panic Devices .
