Project Details

Celadon City is a 200-acre integrated urban area in Ho Chi Minh City that boasts expansive parklands and convenient access to a multitude of modern-day conveniences. The development's 40-acre Central Park encompasses three lakes and over 2,000 mature trees in an arc formation. This provides the majority of the apartments at Celadon City panoramic views of the tranquil surroundings. The exclusive and secure Central Park, the largest private park in the city, is divided into various activity zones so that the different generations within the family can partake in the activities that best match their interests.

Solution

Mechanical hardware included hinge, mortise lock, cylinder, key in lever and accessories.
