Lodha Group

Feature products

Architectural Hardware
Master-keyed Cylinders
Fire Door Hardware

Project Details

Great cities are those that offer their people great opportunities. They encourage business and create desirable jobs to achieve economic prosperity allowing families to lead rich and varied lives. We can say with confidence that Palava promises to be such a city.

A place where businesses flourish, students dream bigger, and athletes go farther than ever before. As Mumbai's sister city, Palava isn't just a new place to live, it's a new way to live.

It is also one of the largest residential cluster projects in the world, with 760 buildings in total.

Solution

Through the combined efforts of the Specification and Sales teams, ASSA ABLOY India created a mutually dependent partnership with Lodha Group, one of India's largest and most well known Residential Builders. A carefully crafted system of Keyed Alike and Master keyed Cylinders was designed, in consultation with the architect and client, which has resulted in a smooth and constant supply of hardware to Lodha. Apart from the cylinders, all hardware related to fire doors and utility doors is also currently being supplied by ASSA ABLOY India.
